

YOUR SPECIALIST FOR CONDENSATE

FROM HEATING AND
AIR-CONDITIONING

DO YOU NEED TO NEUTRALISE?

HEATER		NEUTRALISATION OBLIGATION
Gas	0 – 200 kW	✓*
	> 200 kW	✓
Oil	0 – 70 kW	✓*
	> 70 kW	✓

Source: Suissetec fact sheet

*Exception: 100% acid-resistant sewerage

WHY IS NEUTRALISATION SO IMPORTANT?

- Requirement of the Suissetec leaflet „Condensate-drainage and disposal“.
- Avoidance of corrosion damage
- Protection of the environment

NEUTRALISATION EXPLAINED BRIEFLY

Gas and oil heating systems produce a sulphurous acid with a corrosive effect during operation.

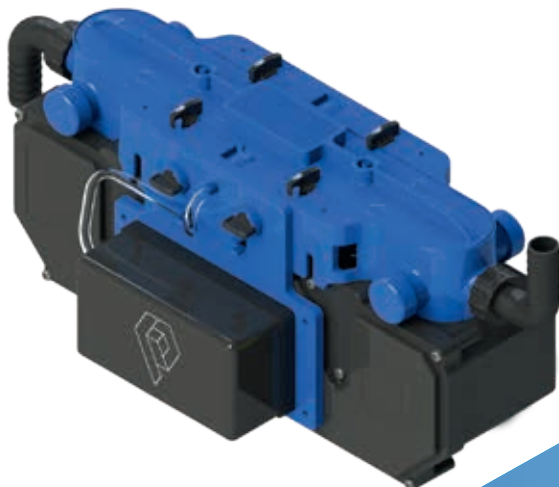

The simple installation of a neutralisation system from Powercondens neutralises the condensate.
