

maXchange MX

Flue gas heat exchanger for gas and oil condensing units up to 2000 kW

The maXchange MX flue gas heat exchanger increases the efficiency of heating systems by up to 15 % - thanks to condensation technology and integrated thermal insulation. All elements are plug & play mounted. This enables rapid commissioning.

Your benefits with maXchange MX at a glance

- **Plug & Play:**
All elements are fully assembled. Connection and commissioning takes place in short time.
- **Legal requirements:**
The maXchange complies with the state of the art paper (STP) of the Association of Cantonal Fire Insurers (VKF). The housing is made of stainless steel and can therefore also be used with fuel oil containing sulphur (up to Euro quality).
- **Eco-friendly:**
The maXchange increases energy efficiency by up to 15 %. The device uses heat and is easily retrofittable to any oil or gas heating system up to 2000 kW
